

South Asian Meteorological Association

South Asian Meteorological Association is aimed to provide a platform among meteorologists of South Asian Countries (Afghanistan, Bangladesh, Bhutan, India, Maldives, Myanmar, Nepal, Pakistan, Sri Lanka) to promote meteorology for larger good for society. The broad objectives of the society are:

1. Foster interaction amongst professionals working in meteorology and allied fields including agriculture in South Asia.
2. Advancement of meteorological and allied sciences in South Asia.
3. Communicate knowledge of such sciences both among the scientific workers and among the public through Citizen Science.
4. Application of meteorology and allied sciences for the socio-economic development of the region.
